

SCUDERIA

CT Scuderia Collection

History

Some people are born watch designers: Enrico Margaritelli represents the third generation of an Italian family of passionate watchmakers. A love of detail and the cult of mechanical engineering were instilled in him by his grandfather Ariodante, who invented high precision instruments and timepieces for military use during the First and Second World Wars. From his family, Margaritelli has inherited his love of hand craftsmanship, a strong work ethic, the careful choice of materials, and an attention to detail that makes the difference. Always.

His love of beautiful motorcycles and mechanical engineering is reflected in the timepieces designed by Margaritelli, who has come a long way since starting out in the family shop in Parma. In his outstanding career, he collaborated with Fossil and Emporio Armani before going on to create the independent brands Soviet and Key West.

In 2013, Margaritelli established the CT Scuderia brand. CT as in ContaTempo, or timepiece in Italian, created for people who live life, like him, in a dimension of speed and elegance.

The expert watchmaker has infused the brand with a powerful personality expressed by sporty features and the inimitable classic creativity of Italian design.

The superiority of Italian design and the impeccable elegance of CT Scuderia are the fruit of a true passion for everything beautiful and dynamic

Cafe Racer concept

No watch interprets the aesthetic of speed better than a CT Scuderia Cafe Racer. An unprecedented collection of unique timepieces that resolutely combine the rigour of Swiss construction, the elegance of Italian design, and the inspiration of classic English motorcycles.

The excitement aroused by cafe racers and their exclamatory style merge man and motorcycle in a lifestyle made of speed and pronounced individuality. This is the fuel that powers Margaritelli's unique dream, like the custom specials brought to life by a master mechanic's hands.

The masculine character of a CT Scuderia Cafe Racer reveals its uniquely Italian sense of beauty, so that all you need are a leather jacket, a pair of sunglasses and the right shoes (leave your boots in the garage for once) to be world ambassadors. The metal, the sophisticated finishes and the leather strap as soft and elegant as a racing glove tell the story of a highly personal style that has been refined with passing time. It is the style of a man who is always ready to start his engine and set off, curious to know what lies around the next bend, who he'll meet at the next bar, and where the next stage in his journey will take him.

CT Scuderia timepieces reflect the underlying aesthetic of competition motorbikes and a taste for aggressive styling. An instant classic for people with a lifestyle that is indifferent to passing fashions, for the modern gentleman with a strong passion for quality, and for those who like to share it with the people they gather around themselves

Iconic assets

1. Three-piece steel case with crown and pushers at 12 or 6 h.

The unique feature of the crown and pushers give the timepiece the authoritative imprint of a stopwatch. Only CT Scuderia watches have real interchangeable functional screws.

Designed in Italy,
built in Switzerland

2. Dial race inspired

A quick glance that doesn't distract from the pleasure of driving: CT Scuderia's dials and hands are inspired by the instruments fitted to classic racing motorbikes and sports cars.

Big numbers matter.
A glance is all it takes
to fall in love with the clean,
timeless racing graphics

Iconic assets

3. Leather strap

The class can be found hiding in the details, like the strong strap handmade from supple leather and double stitched with cotton thread.

4. Case back

For people who love the beauty of mechanical engineering, nothing is more exciting than an engine's gear wheels or a watch's mechanism in full view. That's why each CT Scuderia automatic watch has the see-through case back framed by the Italian tricolour motif, iconic detail of all CT Scuderia watches.

The tricolour motif is a statement of Italian made sportiness.

CORSA

CLASSIC 012

The Corsa chronograph has the unmistakable design of a stopwatch, the absolute ruler of racing and its dominant force. The blue and red pushers at 12 o'clock tell the story of a legendary age of track heroes, who risked and won with only themselves and their mechanical vehicles to count on.

The white dial and big numbers capture lap times at a glance. The 44 mm case is easily detached from the leather strap so that the Corsa can be worn on a neck chain.

CORSA

CLASSIC 012

STEEL CHRONOMETER CASE

The three pieces of the 44 mm diameter, 13.5 mm thick case are held together by 12 screws, like the frame of a vintage motorcycle

SWISS MADE MOVEMENT

Three indicators and maximum precision from the Swiss Made RONDA 3520 D quartz movement, protected by the screw-in case back with a tricolour motif

CROWN AND RING AT 12 O'CLOCK

At the top of the case are the interchangeable screw-down release and stop pushers and the crown with ring. Sapphire crystal glass

PREMIUM STRAP

The rapid release mechanism lets you switch and swap between a fine Italian leather strap (smooth or lightweight), a steel bracelet or a strong and super light silicone band

SCRAMBLER

SATURNO

Powerful, bold and unmistakable, it boasts an Italian name, design and colours. The Scrambler represents an absolute novelty and a turning point, because it is the first CT Scuderia watch to have a square-shaped case.

The collection takes its name from the storied scrambler, i.e. the on and off road motorcycle created on the West Coast of America in the 1960s. Suited to city center streets, but ready to venture onto unpaved desert and mountain tracks, this is the spirit of the Scrambler chronograph.

SCRAMBLER

SATURNO

STEEL CHRONOMETER CASE

For the Scrambler Saturno, strength is the square-shaped, 44 x 42 mm, 13.5 mm thick three-piece steel case, with three finishes: copper, steel and black

BOLD CHARACTER

The precision of the Swiss Made RONDA 3520 D quartz movement is protected by a case held together by 12 screws, water resistance to 10 ATM-100 meters, and the solidity of the sapphire crystal glass

SCUDERIA ITALIA, EXTRA BOLD STYLE

The tricolour pushers at 12 o'clock and the red and green chronograph hands and dials pay tribute to extra bold Italian style. A quick glance is all it takes to check the time in the heat of the action

PREMIUM STRAP

The rapid release mechanism lets you switch and swap between a fine Italian leather strap (smooth or lightweight), a steel bracelet or a strong and super light silicone band

BULLET HEAD

COLLECTION STYLES

The BULLET HEAD collection by CT Scuderia revisits the cafe racer and heritage racing aesthetic from the golden age of the race track through four iconic versions:

Dashboard with “Miles per Hour” lettering, inspired by the graphic design of rev counters and speedometers on racing motorbikes and sports cars; Chequered Flag, enhanced by the iconic racing motif; Carbon Fiber, lightweight by definition; and Saturno, with its signature CT Scuderia design. For the modern gentleman and motor sports lover.

BULLET HEAD DASHBOARD AUTOMATIC

CAFE RACER STYLE

Only the Bullet Head Dashboard faithfully replicates the graphic design of vintage speedometers with the double contrasting number scale. Like a true custom special motorbike, the Bullet Head stands out for the black screw-down crown at 6 o'clock

STEEL CASE

The Bullet Head's three-piece case, held together with a total of 12 screws, is made of steel like the tubular frames of cafe racers. A full 44 mm in diameter and 14 mm thick, it is waterproof to 10 ATM - 100 meters

SWISS MADE AUTOMATIC MOVEMENT

The see-through screw-in case back reveals the LANDERON DP 18 automatic movement that drives three high visibility hands: the seconds indicator is embellished by the red CT Scuderia logo

PREMIUM STRAP

The rapid release mechanism lets you switch and swap between a fine Italian leather strap (smooth or lightweight), a steel bracelet or a strong and super light silicone band, here in the brand new tyre-tread racing-oriented design

TOURING

COLLECTION STYLES

Every minute matters, every detail on the Touring automatic timepiece - with its gran turismo-style elegance, fitted with the LANDERON DP 18 automatic movement - is important.

Simple, clear and direct, like the voice of an internal combustion engine. The dial graphics, with the double concentric scale for hours and seconds, are visible at night too. The date window on the special Testa Piatta version is at 12 o'clock.

If life is a race, you never want to stop.

TOURING

CODA CORTA AUTOMATIC

SWISS MADE AUTOMATIC MOVEMENT

The Touring Coda Corta by CT Scuderia has a see-through screw-in case back, revealing the LANDERON DP 18 automatic movement inside

THREE-PIECE CASE

Like the bodywork of a 1950s gran turismo automobile: the polished 40 and 44 mm diameter steel case has a three-piece construction. Water resistant to 10 ATM-100 meters, with a screw-in case back featuring an enamel tricolour motif and sapphire crystal glass

HIGH VISIBILITY DIAL

The double concentric scale, the extra-bold hands and the BarLumi Bright Night Vision indicators contrasting with the blue dial are all high visibility

PREMIUM STRAP

The rapid release mechanism lets you switch and swap between a fine Italian leather strap (smooth or lightweight), a steel bracelet or a strong and super light silicone band
